Dear Reader

This Issue is dedicated to American Bridges.

First, we bring you an overview and description of design and construction of The Governor Mario M. Cuomo Bridge in New York. The presentation is accompanied with drawings and a rich photo and video gallery.

It is followed by an interview with Ms Jamey Barbas, Project Director of this Bridge, and her CV which provides an overview of the relevant projects she has been involved in.

Barry Colford of US AECOM wrote for us an article on Risk Based Inspection of Bridges in the USA.

Showcasing Canadian Steel Bridges from Coast to Coast is the name of another article which was written by Hellen Christodoulou. She is CISC – ICCA (The Canadian Institute of Steel Construction) Regional Manager in Quebec and in her article she focuses on bridges that have been awarded The Design Award.

The last article of this issue describes Bridges to Prosperity's history and development in Latin America and the Caribbean and their three projects there: San Vicente Bridge in Nicaragua, Duraznal Bridge in Bolivia and a bridge in Banacito in Panama.

I would very much like to thank Derya Thompson for all her support, assistance, cooperation and patience with me during preparation of this issue. I believe we will get back to you with more articles and information on American Bridges in the future.

We are very happy to announce that our magazine has a new partner – the company ARUP. I would very much like to thank Mr Naeem Hussain for his support.

We agreed with Mr Marco Rosignoli on barter based mutual promotion so you can find in this issue information on his [bridge tech forum and web](#).

This year, similarly to last year, we again cooperate with the company SELEM DMCC from Dubai, UAE, and become a medial partner to their conference on [Cost, Procurement and Risk in Engineering Sector](#) which will be held on 24 – 25 October in Dubai.

Next Issue of e-mosty: Vessels and Equipment for Bridge Construction will be released on September 20th. As it is almost full we have decided to prepare another specialized issue in September 2019.

e-mosty December 2018 focuses on Asian, Australian and New Zealand Bridges and in March 2019 on Multi-Span and Long-Span Bridges. Please see also our [Editorial Plan](#) for more details.

I kindly invite you to contribute to the issues mentioned above. Please contact me on my company e-mail (info@professional-english.cz) or LinkedIn and we will arrange the details of your presentation.

Magdaléna Sobotková
Chief Editor

e-mosty

The magazine **e-mosty** (“e-bridges”) is an international, interactive, peer-reviewed magazine about bridges.

It is published on www.e-mosty.cz and can be read free of charge (open access) with possibility to subscribe.

It is published quarterly: 20 March, 20 June, 20 September and 20 December.

The magazines stay **available on-line** on our website.

It is also possible to download them as **pdf**.

The magazine **brings original articles about bridges and bridge engineers** from around the world. Its electronic form enables publishing of high-quality photos, videos, drawings, links etc.

We aim to include **all important and technical information** and show the grace and beauty of the structures.

Editorial Plan

We are happy to provide **media support** for important bridge conferences, educational activities, charitable projects, books etc.

Our **Editorial Board** comprises bridge engineers and experts from the UK, US and Australia.

The readers are mainly bridge engineers, designers, constructors and managers of construction companies, university lecturers and students, or people who just love bridges.

Partnership and promotion of your company in our magazine e-mosty

Basic price for Annual Partnership is **990 EUR a year plus VAT**.

For this money you will get:

- A **logo on the main page** on our website.
- 1 page interactive **presentation of your company in every issue**.
- Your logo and / or the name of your company on **every publication and output we release**.
- In compliance with our Editorial Plan we can also publish one **technical article** during the year (which we can help you prepare).

Both the price and the extent of cooperation are fully negotiable.

e-mosty

Additional Information

The magazine e-mosty ("e-bridges") is an **international, interactive, peer-reviewed magazine about bridges published quarterly on www.e-mosty.cz**

It is **open access with a possibility to subscribe**.

It was established in April 2015 and its first issue was released on 20 June 2015 as a bilingual Czech – English magazine aimed mainly for Czech and Slovak bridge engineers.

Very quickly it reached an international readership.

In 2016 we extended the already existing Czech and Slovak editorial board by two bridge experts from the UK, and in 2017 two colleagues – from the USA and Australia – joined us.

Since December 2016 the magazine has been published solely in English.

Each issue now has **thousands of readers worldwide**.

Generally the readership has reached almost **10 000 in two years**.

Many of our readers share the magazine in their companies and among their colleagues so the final number of readers is much higher.

Most importantly the **readership covers our target segment** – managers in construction companies, bridge designers and engineers, universities and other bridge related experts.

We also know that the readers usually go back to older issues.
